- Community Building

PROFESSIONAL SUMMARY

Passionate Software Engineer, Technical Instructor, and Founder with hands-on experience building scalable web applications, training aspiring developers, and delivering digital solutions for businesses. Experienced in Python, Flask, JavaScript, React, HTML, CSS, MySQL, and responsive web development, with a strong background in technical education, mentoring, client management, and project execution. Committed to building innovative software solutions while helping individuals develop practical technology skills through engaging, project-based learning.

PROFESSIONAL EXPERIENCE

Founder & Lead Software Engineer — 2024 – Present

DIRAN HUB (Diran Tech Academy)

A technology and creative company providing software development, digital solutions, branding, and technical education.

- Design and develop modern websites and web applications for businesses.
- Build scalable backend systems using Python and Flask, and responsive frontend interfaces using HTML, CSS, JavaScript, and React.
- Manage client projects end-to-end, from planning through deployment.
- Train and mentor students in web development, locally and internationally, including practical AI integration and career preparation.
- Lead branding, digital strategy, and creative design initiatives.

Achievements: Delivered 3+ web development projects for businesses; trained 30+ students in web development and programming; built 5 production-ready web applications using Python, Flask, and JavaScript.

Technical Instructor — 2024 – Present

CodeCamp (Seasonal Summer Instructor)

Teach programming and technology skills to children and young learners during annual coding bootcamps.

- Teach Python, HTML, CSS, and JavaScript to young learners.
- Guide students through real-world software projects and debugging exercises.
- Design engaging classroom activities and coding exercises.
- Evaluate student performance and provide ongoing mentorship.

SELECTED PROJECTS

OMAK Logistics — Full-Stack Developer
Designed and developed a logistics management platform featuring authentication, parcel tracking, rider dashboards, delivery workflows, and database-driven operations.
Tech: Python, Flask, JavaScript, HTML, CSS, MySQL | omaklogistics.com

Tectonic Global Services — Full-Stack Developer
Developed a professional surveying services website with booking functionality, service management, and responsive customer-facing interfaces.
Tech: Python, Flask, JavaScript, HTML, CSS | tectonic1.pythonanywhere.com

Real Estate Management Platform — Backend Developer
Built a property management system featuring secure authentication, seller workflows, property listings, admin approval systems, and database-driven operations.
Tech: Python, Flask, MySQL, JavaScript

DIRAN WEARS
E-commerce platform supporting product management, customer accounts, and online shopping workflows including payment integration concepts.

MamaGuard
AI-powered maternal health solution built at the NITHUB Hackathon, focused on postpartum healthcare support and intelligent health recommendations.
